

Internet capacity building programme at Kaziranga varsity

GUWAHATI, March 2: The Kaziranga University hosted the Indian Internet Engineering Task Force (IETF) capacity building programme on the university campus on Sunday, stated a press release.

The programme was organised by the Internet Society (ISOC), Kolkata Chapter, and approved by DeitY, Government of India. The event was attended by Dr Abhijan Bhattacharjee of TCS Innovation Lab, Kolkata, among other.

Dr Sunil Rai, Vice-Chancellor of Kaziranga University, Dr Prashanta Kumar Mishra, president of North Eastern Knowledge Foundation and other dignitaries were also present in the programme.

Dr Indrajit De, IICB Program Chair, said, "It is important to generate awareness about IETF because it generates and governs Internet Protocols." He added that the capacity building programme is specially designed to focus more on creating new internet development by understanding what internet protocols are.

Speaking at the occasion, Abhijan Bhattacharjee, the key note speaker for the programme, said, "The Indian IETF Capacity Building (IICB) Programme is an attempt to increase the lower participation of Indians, corporate in the international internet standard making process and specifically in IETF with an objective to empower internet professionals by broadening their experience and enabling their participation in open Internet standards development."
